

SUMMARY

Flutter Developer with 1.5 years of experience in creating robust, scalable mobile and web applications. Skilled in both frontend and backend development, with a strong foundation in building full-stack solutions from the ground up. I take pride in writing clean, maintainable code and delivering user-friendly digital products. Passionate about continuous learning and always eager to take on challenging projects involving advanced technologies like Redis, Cloudflare, and scalable cloud architectures. Ready to grow with a forward-thinking team and contribute meaningfully to real-world solutions

Work Experience

Flutter Developer

Present

Expertise

Cordrila Infrastructure Pvt LTD

- Developed a web app and employee-focused delivery app using Flutter.
- Ensured responsive design, seamless performance, and efficient functionality across platforms.
- Integrated Firebase for real-time data management and scalable features.
- Delivered optimized solutions that improved user experience and operational efficiency.

Cotolore Enterprises LLP

- Developed and deployed the Kealthy e-commerce app independently on the App Store and Play Store. Named (Kealthy)
- Integrated MongoDB and Firestore for data management and live order tracking.
- Implemented Razorpay payment gateway for secure transactions and push notifications for real-time updates.
- Designed and developed e-commerce apps and delivery apps with robust backend servers.

Inspirezest Technologies

- Led the development and deployment of a real estate website – [dreamslandrealty.com](#).
- Handled end-to-end development with Flutter for the frontend and Node.js for the backend.
- Integrated MongoDB and Firestore to manage dynamic property listings and user data.
- Deployed the backend server and hosted the full-stack application independently.
- Ensured seamless cross-platform performance and optimized the UI for speed and responsiveness.
- Collaborated with the design and operations teams to turn requirements into practical solutions.

- Languages & Frameworks: Flutter, Dart, Node.js
- State Management: Riverpod, Provider
- Database: MongoDB, Firestore, Realtime Database
- API & Backend: REST API, Cloud Functions, Server Backend Hosting,Azure Hosting
- Notifications & Messaging: Push Notifications, Firebase Cloud Messaging (FCM)
- Authentication & Payments: OTP Authentication, Razorpay Integration ,Google Sign in
- Tools & Technologies: Postman, Git
- IDEs: Android Studio, Visual Studio Code
- Deployment:App Store, Play Store, Firebase, Google Cloud, Microsoft Azure, Vercel, Hostinger,

Education

BA English Literature

2021-2024

Calicut University, Kerala

Bachelor of Arts in English Literature
Calicut University, Kerala (2021 – 2024)

Projects

Kealthy: Healthy Foods & Grocery

- Developed and deployed the Kealthy e-commerce app on the Play Store and App Store, handling end-to-end development.
- Built the front end using Flutter and the back end with Node.js, integrating MongoDB for efficient data management.
- Implemented Firebase push notifications, real-time order tracking, and a seamless ordering experience for users.
- Created an AI assistant named Nutri to provide personalized nutrition recommendations.
- Hosted the application on Azure and Firebase for scalable performance and high availability.
- Integrated OTP authentication, ensuring secure user login and access.
- Used Razorpay for secure payment processing and integrated Google Maps for location-based services.

Kealthy Delivery

- Developed the Kealthy Delivery App to streamline order management and delivery tracking.
- Built using Flutter (front end) and Node.js (back end) for seamless functionality.
- Implemented real-time order updates, route optimization, and Firebase push notifications for efficient delivery operations.
- Focused on ensuring a smooth and responsive user experience for both delivery personnel and customers.

Cordrila Infrastructure

Developed the Cordrila Delivery App and Cordrila Admin Web App using Flutter and Firebase, enabling delivery personnel to log deliveries, track attendance, and allowing admins to manage and monitor real-time data effectively for smooth delivery operations.

dreamslandrealty.com

- Developed dreamslandrealty.com, creating a CRM app, customer app, admin app, and agent app, all integrated into a seamless web application.
- Built with Node.js for the backend and MongoDB for database management, ensuring a robust, scalable solution.
- Hosted the entire project independently, managing both deployment and ongoing maintenance.
