

Vishnu P

Flutter Developer • Full-Stack Mobile & Web Engineer

vishnup.contact@gmail.com • +91 7994689802 • vishnudev.web.app

PROFESSIONAL SUMMARY

Software Developer with 2+ years of hands-on experience building and shipping production-grade mobile and web applications using Flutter, React, and Next.js on the frontend, and Node.js (NestJS) on the backend. Proven track record of independently leading full-cycle development — from PostgreSQL and MongoDB schema design to cloud deployment on AWS, GCP, and Firebase. Shipped apps to both the Play Store and App Store. Experienced in integrating payment gateways (Razorpay), WhatsApp Business APIs (Meta), AI content generation, and real-time systems.

TECH STACK & FRAMEWORKS

Frontend: Flutter, Dart, React, Next.js

Backend: Node.js, NestJS, Express

Cloud & Infra: AWS (EC2, S3), Firebase, GCP

Databases: PostgreSQL, MongoDB, Firestore

Integrations: Razorpay, Google Maps API, WhatsApp Business API (Meta), OTP & Gmail Auth

AI / ML: Google Gemini, Groq AI

DevOps & Tools: Git, Bitbucket, CI/CD pipelines

EXPERIENCE

Ruminuz Digital Pvt Ltd

12/2025 – Present

Flutter Developer

- Built a WhatsApp-based customer retention automation tool, enabling bulk campaign delivery and automated reply flows for 500+ business clients via Meta WhatsApp Business API.
- Engineered Meta API integration layer handling template messaging, webhook event processing, and OTP-based authentication — reducing manual follow-up effort by an estimated 40%.

Inspirzest Technologies

01/2025 – 12/2025

Flutter Developer

- Owned end-to-end delivery of 3 client projects — mobile app development, Node.js backend integration, and cloud hosting on AWS/Firebase — achieving 99.9% uptime post-launch.
- Optimised UI rendering and database query performance, resulting in a 20% improvement in app load speed and a 25% increase in user engagement within 60 days of release.
- Established deployment pipelines and CI/CD workflows that cut release cycle time from days to under 2 hours.

Cotolore Enterprises LLP

01/2024 – 03/2025

Flutter Developer

- Independently architected and delivered full-stack applications across mobile (iOS & Android) and web platforms, serving as sole developer across frontend, backend, and infrastructure.
- Integrated Razorpay payment gateway and designed real-time order tracking architecture using Firebase, supporting 1,000+ concurrent users at peak load.
- Led frontend and backend implementation for a food & grocery e-commerce platform — apps successfully published on both Play Store and App Store.

PROJECTS

Kealthy Food & Grocery

- Developed and deployed a consumer e-commerce app and a separate delivery partner app (both Android & iOS), handling product browsing, cart, checkout, and order management.
- Built real-time order tracking using Firebase Push Notifications and live location updates, reducing customer support queries related to order status by ~30%.

- Delivery partner app reached 4.2★ on the Play Store within the first 3 months, with 1,000+ active delivery partner installs.

Ybes Loyalty

ybes.app

- Built a Flutter Web dashboard for managing and scheduling bulk WhatsApp campaigns to 10,000+ contacts, with delivery analytics and opt-out management.
- Integrated Meta WhatsApp Business API for template-based messaging and automated reply flows, enabling businesses to handle customer queries without human intervention.

Dreams Land Realty

dreamslandrealty.com

- Delivered a real estate CRM ecosystem comprising a property listing app and an agent performance app, streamlining lead tracking for a team of 50+ agents.
- Designed backend sync logic using Firebase to maintain real-time consistency between the CRM and agent apps, with push notifications for new lead assignments.

Resume Achieve — AI Resume Builder

resumeachieve.com

- Built a high-performance ATS-friendly CV generator with dynamic template processing, allowing users to produce job-ready resumes in under 3 minutes.
- Integrated Google Gemini AI to generate context-aware resume content, increasing user-reported ATS pass rates by an estimated 35% vs. manually written resumes.
- Implemented server-side data parsing to transform raw user input into structured, formatted resume outputs across 8 design templates.

EDUCATION

Calicut University

01/2020 – 12/2024

Bachelor of Arts
